## PROFILE

Javascript (React, React Native, Next.js, Node.js), Ruby, Rails, HTML, CSS, SQL, AWS, Docker.

I'm a problem-solver at heart, starting out my career as a consultant before discovering I wanted to build handsome, good for society, products.

Positive, endlessly curious and perceptive, I like to create seamless experiences that will leave you with a smile - at least that's the plan anyway.

## WORK EXPERIENCE

### Full Stack Developer, Andersen EV

May 21 - Oct 22

Andersen makes charge points for electric vehicles. As part of a small team I have owned our **React** website and worked on our **React Native** app, backend **APIs** and **AWS** infrastructure - introducing new features to existing systems but also creating brand new products including a **dashboard** and **buying journey** built using **Next.js**.

I have also:

- Implemented customised integration of **PayPal** Pay Later and **Stripe**, processing **over £5m** of transactions without issue
- Designed, coded and launched a new product configurator using **Figma & React**
- Managed and built large scale **API integrations** using **Node.js** and **AWS Lambda**

### Teaching Assistant, Le Wagon

Mar 21 - May 21

Provided daily assistance with problem-solving and debugging coding challenges. Helped educate students on both back-end and front-end concepts and syntax in **Ruby on Rails**, Javascript, HTML, CSS and SQL.

### Founder / Full Stack Developer, Apt

Jan 21 - Present

Delightfully Digital. Apt specialises in creating online experiences which delight your customers. Projects: [swopbox.net](http://swopbox.net), [chapronev.com](http://chapronev.com).

### Solutions Consultant, Agilisys

Sep 19 - Sep 20

Played a key role in successfully winning a bid for City of London worth **£70m**. Built a platform for the Metropolitan Police to **manage and govern** their Power Platform apps, users and policies. Worked with Hillingdon Council to create their **IT strategy** for the next 5 years

### Cloud Consultant, Agilisys

Feb 19 - Sep 19

Responsible for **discovering and analysing** a clients current hosting and application environment in preparation for a migration to the **public cloud**. I have:

- **Led** two successful cloud discoveries (over 2000 servers)
- **Mentored** two new analysts, assigning them their day to day tasks
